

# Green-cheeked and Maroon-bellied Conures

*Pyrrhura mollinae and Pyrrhura frontalis*

## CARE SHEET

Developed with and approved by a Qualified Veterinarian

These conures are highly inquisitive, bold, and engaging animals. Like other conures, they can be playful and affectionate. Their voices are softer than many conures.

### Is this conure the right companion animal for you?

Yes	No
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>

Check "Yes" or "No" after reading the following statements:

- I have an appropriate and safe space for this bird.
- I know that choosing this bird can be a long-term commitment.
- I will provide daily, supervised time for this bird outside a cage.
- The natural sounds of this bird will be acceptable to family members and neighbors.
- A mature person will provide responsible and primary care for this companion animal.

If you answered, "Yes" to these statements, a green-cheeked or maroon-bellied conure may be the right choice for you! Continue reading about how to care for a green-cheeked or maroon-bellied conure and consult with a PETCO associate to learn more. PETCO is committed to responsible companion animal care.

**Average Size** 10 inches long **Life Span** 20+ years with proper care

**Diet** Specialized pelleted diets are highly recommended and should consist of 60–70% of the diet; use fortified seeds in moderation as they are higher in fat and less nutritious than pellets  
 Legumes, dark green or dark orange vegetables and fruits, supplemented with well-cooked eggs or meat, tofu, tuna, limited dairy products, pasta, whole wheat bread, and cereal  
 Clean, fresh, filtered and chlorine-free water changed daily  
 Do not feed birds fruit seeds, avocados, chocolate, alcohol, or caffeine as these can cause serious medical problems

**Feeding** If your bird is used to a seed diet, convert to pellets gradually; fresh pellets or seeds and fresh, clean, chlorine-free water should always be available  
 Fresh fruits and vegetables should be given daily; discard when not eaten within 24 hours; conures appreciate quality and variety in their food

**Housing** Birds acclimate well to average household temperatures; be cautious of extreme temperature change; cage should be placed off the floor in an area that is well-lit and away from drafts  
 A cage approximately 24" W x 24" D x 30" H, with metal bars spaced no greater than 1/2" apart, makes a good home for your conure; as with all animals, it is best to provide the largest habitat possible; a flight cage is strongly recommended  
 Perches should be at least 9" long and 1" in diameter; a variety of perch sizes to exercise feet and help prevent arthritis is recommended  
 A metal grate over the droppings tray will keep the bird away from droppings; line the droppings tray with cage paper or appropriate substrate for easier cleaning; to avoid contamination, do not place food or water containers under perches

**Bird owners should avoid non-stick cookware and appliances as they can release fumes hazardous to your birds health**

# Green-cheeked and Maroon-bellied Conures

*Pyrrhura mollinae* and *Pyrrhura frontalis*

## CARE SHEET

Developed with and approved by a Qualified Veterinarian

### Normal Behavior and Interaction

They will play games with their owners; can be toilet trained  
They are aggressive chewers; supervise when out of cage; best kept in pairs for companionship

### Habitat Maintenance

Clean and disinfect the cage and perches regularly; replace substrate or cage liner weekly or more often if needed; replace food and water daily

Replace perches, dishes, and toys when worn or damaged; rotate new toys into the habitat regularly

Ensure that there are no cage parts or toys with lead, zinc or lead and lead-based paints or galvanized parts as these can cause serious medical issues if ingested by your bird

### Grooming and Hygiene

Provide filtered, chlorine-free, lukewarm water regularly for bathing, and remove the water when done; as an alternative, mist the bird with water or a grooming spray

Clipping flight feathers is not necessary, but when done correctly it can help prevent injury or escape; consult an avian veterinarian on what is best for your bird

Nails should be trimmed by a qualified person to prevent injury to the bird

### Signs of a Healthy Bird

- Active, alert, and sociable
- Dry nostrils and bright, dry eyes
- Clean, dry vent
- Eats and drinks throughout the day
- Beak, legs, and feet appear normal
- Smooth, well-groomed feathers

### Common Health Issues

Health Issue	Symptoms or Causes	Suggested Action
Chlamydiosis	Appetite loss, fluffed feathers, nasal discharge.	Seek immediate veterinary attention.
Diarrhea	Fecal portion of stool not formed. Multiple causes, from change in diet to internal parasites.	Seek veterinary attention. Ensure correct diet. Reduce fruit intake.
Feather Plucking	Bird plucks own feathers; may be due to boredom, poor diet or other illness.	Relieve boredom with attention, new toys, or more room; improve diet. Seek veterinary advice.
Polyoma Virus	Anorexia, lethargy, weight loss, sudden death.	Seek veterinary attention.

### Red Flags

- Beak swelling or accumulations
- Wheezing or coughing
- Eye or nasal discharge
- Fluffed, plucked, or soiled feathers
- Runny or discolored stools
- Red or swollen eyes
- Sitting on floor of habitat
- Favoring one foot
- Loss of appetite

If you notice any of these signs, please contact your avian veterinarian.
