

Nanday Conure

Nandayus nenday

CARE SHEET

Developed with and approved by a Qualified Veterinarian

Nanday conures are colorful, sociable and acrobatic extroverts. A nanday thrives on attention and gets along well with other parrots and finches.

Is a nanday conure the right companion animal for you?

Yes	No
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>

Check "Yes" or "No" after reading the following statements:

- I have an appropriate and safe space for this bird.
- I know that choosing this bird can be a long-term commitment.
- I will provide daily, supervised time for this bird outside a cage.
- The natural sounds of this bird will be acceptable to family members and neighbors.
- A mature person will provide responsible and primary care for this companion animal.

If you answered "Yes" to these statements, a nanday conure may be the right choice for you! Continue reading about how to care for a nanday conure and consult with a PETCO associate to learn more. PETCO is committed to responsible companion animal care.

Average Size 12 inches long **Life Span** 20+ years or more with proper care

Diet Specialized pelleted diets are highly recommended and should consist of 60–70% of the diet; use fortified seeds in moderation as they are higher in fat and less nutritious than pellets
 Diced fresh fruits (apples, grapes, pomegranates, and dark orange-colored fruits) and chopped dark green or orange vegetables; raisins
 Clean, fresh, filtered and chlorine-free water changed daily
 Do not feed birds fruit seeds, avocados, chocolate, alcohol, or caffeine; these can cause serious medical problems

Feeding If your bird is used to a seed diet, convert to pellets gradually; fresh pellets or seeds and fresh, clean, chlorine-free water should always be available
 Fresh fruits and vegetables should be given daily; discard when not eaten within 24 hours; conures appreciate quality and variety in their food

Housing Birds acclimate well to average household temperatures; be cautious of extreme temperature change; cage should be placed off the floor in an area that is well-lit and away from drafts
 A cage approximately 30"W x 30"D x 36"H, with metal bars spaced no greater than 1/2" apart, makes a good home for your conure; as with all animals, it is best to provide the largest habitat possible; a flight cage is strongly recommended
 Perches should be at least 9" long and 1/2" in diameter; a variety of perch sizes to exercise feet and help prevent arthritis is recommended
 A metal grate over the droppings tray will keep the bird away from droppings; line the droppings tray with cage paper or appropriate substrate for easier cleaning; to avoid contamination, do not place food or water containers under perches

Bird owners should avoid non-stick cookware and appliances as they can release fumes hazardous to your birds health

Nanday Conure

Nandayus nenday

CARE SHEET

Developed with and approved by a Qualified Veterinarian

Normal Behavior and Interaction

Considered good talkers
Will play games with their owners; can be toilet trained
Need supervision outside their cage

Habitat Maintenance

Clean and disinfect the cage and perches regularly; replace substrate or cage liner weekly or more often if needed; replace food and water daily
Replace perches, dishes, and toys when worn or damaged; rotate new toys into the habitat regularly
Ensure that there are no cage parts or toys with lead, zinc or lead and lead-based paints or galvanized parts as these can cause serious medical issues if ingested by your bird

Grooming and Hygiene

Provide filtered, chlorine-free, lukewarm water regularly for bathing, and remove the water when done; as an alternative, mist the bird with water or a grooming spray
Clipping flight feathers is not necessary, but when done correctly it can help prevent injury or escape; consult an avian veterinarian on what is best for your bird
Nails should be trimmed by a qualified person to prevent injury to the bird

Signs of a Healthy Bird

- Active, alert, and sociable
- Dry nostrils and bright, dry eyes
- Clean, dry vent
- Eats and drinks throughout the day
- Beak, legs, and feet appear normal
- Smooth, well-groomed feathers

Common Health Issues

Health Issue	Symptoms or Causes	Suggested Action
Chlamydiosis	Appetite loss, fluffed feathers, nasal discharge	Seek immediate veterinary attention
Diarrhea	Fecal portion of stool not formed. Multiple causes, from change in diet to internal parasites	Seek veterinary attention. Ensure correct diet. Reduce fruit intake
Feather Plucking	Bird plucks own feathers; may be due to boredom, poor diet or other illness	Relieve boredom with attention, new toys, or more room; improve diet. Seek veterinary advice
Polyoma Virus	Anorexia, lethargy, weight loss, sudden death	Seek veterinary attention

Red Flags

- Beak swelling or accumulations
- Wheezing or coughing
- Eye or nasal discharge
- Fluffed, plucked, or soiled feathers
- Runny or discolored stools
- Red or swollen eyes
- Sitting on floor of habitat
- Favoring one foot
- Loss of appetite

If you notice any of these signs, please contact your avian veterinarian.
