

Hahn's and Noble Macaws

Ara nobilis, Diopsittaca nobilis, Longipennis

CARE SHEET

Developed with and approved by a Qualified Veterinarian

Hahn's and Noble macaws are fast learners. They are one of the best talkers of all the macaws. These mini-macaws are sweet and cuddly, and like to show off.

Is a Hahn's or Noble macaw the right companion animal for you?

Yes	No
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>

Check "Yes" or "No" after reading the following statements:

- I have an appropriate and safe space for this bird.
- I know that choosing this bird can be a long-term commitment.
- I will provide daily, supervised time for this bird outside a cage.
- The natural sounds of this bird will be acceptable to family members and neighbors.
- A mature person will provide responsible and primary care for this companion animal.

If you answered "Yes" to these statements, a Hahn's or Noble macaw may be the right choice for you! Continue reading about how to care for a Hahn's or Noble macaw and consult with a PETCO associate to learn more. PETCO is committed to responsible companion animal care.

Average Size 8 to 12 inches long

Life Span 20+ years with proper care

Diet Specialized pelleted diets are highly recommended and should consist of 60–70% of the diet; use fortified seeds in moderation as they are higher in fat and less nutritious than pellets
 Fresh fruits and vegetables, such as apples, berries, pears, grapes, broccoli, and carrots
 Clean, fresh, filtered, chlorine-free water
 Do not feed birds fruit seeds, avocados, chocolate, alcohol, or caffeine; these can cause serious medical issues

Feeding If your bird is used to a seed diet, convert to pellets gradually; fresh pellets or seeds and fresh, clean, chlorine-free water should always be available
 Fresh fruit and vegetable supplements should be given daily and should be discarded when not eaten within 24 hours; macaws appreciate quality and variety in their food

Housing Birds acclimate well to average household temperatures; be cautious of extreme temperature change; cage should be placed off the floor in an area that is well-lit and away from drafts
 A cage approximately 30" W x 30" D x 36" H, with metal bars spaced no greater than 3/4" apart, makes a good home for your macaw; as with all animals, it is best to provide the largest habitat possible; a flight cage is strongly recommended
 Perches should be at least 9" long and 1/2" in diameter; a variety of perch sizes to exercise feet and help prevent arthritis is recommended
 A metal grate over the droppings tray will keep the bird away from droppings; line the droppings tray with cage paper or appropriate substrate for easier cleaning; to avoid contamination, do not place food or water containers under perches

Bird owners should avoid non-stick cookware and appliances as they can release fumes hazardous to your birds health

Hahn's and Noble Macaw

Ara nobilis, Diopsittaca nobilis, Longipennis

CARE SHEET

Developed with and approved by a Qualified Veterinarian

Normal Behavior and Interaction Tame and playful; known for acrobatics; fast learners
 Have a well-developed sense of taste; chew aggressively and need a lot of stimulating toys
 Their feet are highly adaptable to grasp toys and food and to climb easily

Habitat Maintenance Clean and disinfect the cage and perches regularly; replace substrate or cage liner weekly or more often if needed; replace food and water daily
 Replace perches, dishes, and toys when worn or damaged; rotate new toys into the habitat regularly

Grooming and Hygiene Provide filtered, chlorine-free, lukewarm water regularly for bathing, and remove the water when done; as an alternative, mist the bird with water or a grooming spray
 Clipping of flight feathers is not necessary, but when done correctly it can help prevent injury or escape; consult an avian veterinarian on what is best for your bird
 Nails should be trimmed by a qualified person to prevent injury to the bird

- Signs of a Healthy Bird**
- Active, alert, and sociable
 - Dry nostrils and bright, dry eyes
 - Clean, dry vent
 - Eats and drinks throughout the day
 - Beak, legs, and feet normal in appearance
 - Smooth, well-groomed feathers

Common Health Issues

Health Issue (alpha)	Symptoms or Causes	Suggested Action
Chlamydiosis	Appetite loss, fluffed feathers, nasal discharge, green stool.	Seek immediate veterinary attention.
Diarrhea	Fecal portion of dropping is loose, weight loss, ruffled feathers. Variety of causes from diet change to internal parasites.	Seek treatment from veterinarian.
Feather Plucking	Bird plucks own feathers.	Give attention, new toys, or space. Seek veterinary advice.
Proventricular Dilation Disease	Depression, weight loss, passing undigested food.	Seek immediate veterinary attention.

- Red Flags**
- Beak swelling or accumulations
 - Wheezing or coughing
 - Eye or nasal discharge
 - Fluffed, plucked, or soiled feathers
 - Runny or discolored stools
 - Red or swollen eyes
 - Sitting on floor of habitat
 - Favoring one foot
 - Loss of appetite

If you notice any of these signs, please contact your avian veterinarian.
