

Pionus Parrot

Pionus spp

CARE SHEET

Developed with and approved by a Qualified Veterinarian

Pionus parrots are usually quiet and gentle with a friendly disposition. Some of these parrots may develop a limited vocabulary. Pionus get along well with other pets.

Is a pionus parrot the right companion animal for you?

Yes	No
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>
<input type="checkbox"/>	<input type="checkbox"/>

Check "Yes" or "No" after reading the following statements:

- I have an appropriate and safe space for this bird.
- I know that choosing this bird can be a long-term commitment.
- I will provide daily, supervised time for this bird outside a cage.
- The natural sounds of a pionus will be acceptable to family members and neighbors.
- A mature person will provide responsible and primary care for this companion animal.

If you answered, "Yes" to these statements, a pionus parrot may be the right choice for you! Continue reading about how to care for a pionus parrot and consult with a PETCO associate to learn more. PETCO is committed to responsible companion animal care.

Average Size 9 to 12 inches long **Life Span** 15+ years with proper care, depending on species

Diet Specialized pelleted diets are highly recommended and should consist of 60–70% of the diet; use fortified seeds in moderation as they are higher in fat and less nutritious than pellets

Clean, fresh, filtered and chlorine-free water changed daily along with fresh twigs to chew on

Do not feed birds fruit seeds, avocados, chocolate, alcohol or caffeine as these can cause serious medical problems

Feeding If your bird is used to a seed diet, convert to pellets gradually

Fresh pellets or seeds and fresh, clean, chlorine-free water should always be available

Fresh fruits and vegetables should be given daily and discarded when not eaten within 24 hours; pionus parrots appreciate variety in their food

Housing Birds acclimate well to average household temperatures; be cautious of extreme temperature change; cage should be placed off the floor in an area that is well-lit and away from drafts

A cage approximately 24" W x 24" D x 36" H, with metal bars spaced no greater than 3/4" apart, makes a good home for your parrot; as with all animals, it is best to provide the largest habitat possible; a flight cage is strongly recommended

A variety of appropriate perch sizes to exercise feet and help prevent arthritis is recommended; provide branches from non-toxic trees

A metal grate over the droppings tray will keep the bird away from droppings; line the droppings tray with cage paper or appropriate substrate for easier cleaning; to avoid contamination, do not place food or water containers under perches

Bird owners should avoid non-stick cookware and appliances as they can release fumes hazardous to your birds health

Pionus Parrot

Pionus spp

CARE SHEET

Developed with and approved by a Qualified Veterinarian

Normal Behavior and Interaction

Acrobatic and playful; loves swings and toys they can pick up with their feet

Loves to bathe

When stressed, these birds make a wheezing noise that sounds like asthma

Habitat Maintenance

Clean and disinfect the cage and perches regularly; replace substrate or cage liner weekly or more often if needed; replace food and water daily

Replace perches, dishes, and toys when worn or damaged; rotate new toys into the habitat regularly

Ensure that there are no cage parts or toys with lead, zinc or lead and lead-based paints or galvanized parts as these can cause serious medical issues if ingested by your bird

Grooming and Hygiene

Provide filtered, chlorine-free, lukewarm water regularly for bathing; remove the water when done; as an alternative, mist the bird with water or a grooming spray

Clipping of flight feathers is not necessary, but when done correctly it can help prevent injury or escape; consult an avian veterinarian on what is best for your bird

Nails should be trimmed by a qualified person to prevent injury to the bird

Signs of a Healthy Bird

- Active, alert, and sociable
- Dry nostrils and bright, dry eyes
- Clean, dry vent
- Eats and drinks throughout the day
- Beak, legs, and feet normal in appearance
- Smooth, well-groomed feathers

Common Health Issues

Health Issue	Symptoms or Causes	Suggested Action
Diarrhea	Fecal portion of stool not formed. Multiple causes, from change in diet to internal parasites.	Seek veterinary attention. Ensure correct diet. Reduce fruit intake.
Obesity	Overfeeding or poor diet.	Regulate amounts and types of food.
Pneumonia	Difficulty breathing caused by bacterial, viral, or fungal infections	Consult a veterinarian.
Pox	Mouth lesions, face scabs.	Seek veterinary attention.

Red Flags

- Beak swelling or accumulations
- Wheezing or coughing
- Eye or nasal discharge
- Fluffed, plucked, or soiled feathers
- Runny or discolored stools
- Red or swollen eyes
- Sitting on floor of habitat
- Favoring one foot
- Loss of appetite

If you notice any of these signs, please contact your avian veterinarian.
